x.com/0xmattchain

Third-year Computer Science student at Chennai Institute of Technology, building at the intersection of AI, blockchain and crypto. Hands-on with real-time AI, smart contracts and full-stack products. Multi-time hackathon finalist and winner; open-source contributor.

EXPERIENCE

ROYALGCC
Jan 2026 — Mar 2026

Backend and Blockchain Developer · Remote

- Built a full-stack platform where users deposit USDT, manage an internal wallet and convert crypto to INR with automated payouts.
- Built Node.js and PostgreSQL/Supabase APIs for authentication, transactions and wallet balances.
- Implemented real-time blockchain transaction tracking, external wallet withdrawals and ledger-based accounting.
- Added KYC verification, OTP authentication, banking integrations and an admin dashboard.

ZERO2SITE
Jan 2025 — Present

Blockchain Developer · Chennai

- Developed and deployed smart contracts with Solidity and Hardhat.
- Integrated blockchain features with React.js frontends and Node.js backends.
- Collaborated with cross-functional teams on fiat-to-crypto processing chains.

GOLDEN OPULENCE
May 2025 — Jul 2025

Intern, Electoral Committee · Chennai

- Supported committee operations and documentation.
- Handled data management and reporting.
- Maintained databases with a focus on data consistency.

SELECTED PROJECTS

HAVX FLAGSHIP · IN DEVELOPMENT

A blockchain-native IDE and wallet for writing, managing and shipping on-chain software from one surface.

TypeScript · React · Node.js · Solidity · Web3.js

BNB Greenfield AI Dataset Marketplace GREENFIELD WINNER

A decentralized marketplace for managing, licensing and sharing AI datasets on BNB Greenfield.

BNB Greenfield · Solidity · TypeScript · React

BitLend BEST IDEA IMPLEMENTED

Decentralized crypto lending with real-time, wallet-based lending and on-chain credit control.

Solidity · TypeScript · React · Wallet auth

Offramp Payroll FINTECH

A full-stack USDT payroll off-ramp for companies, from batch payouts to local-currency settlement.

Node.js · PostgreSQL · Supabase · React

Brikx TOP 10 FINALIST

Real-estate and real-world-asset tokenization for fractional property ownership.

Solidity · TypeScript · React

MannaPay BITCOIN L2

A Bitcoin-powered subscription hub on Layer-2, built for recurring payments without card rails.

Bitcoin L2 · TypeScript · React

BlockVault OPEN SOURCE

A decentralized wallet-gated vault for passwords and personal data, controlled by the holder.

TypeScript · React · Wallet auth

More: InvoPay, SolAI, GeoTrade, Zerohour, Smart Health, Trading Bot.

EDUCATION

B.E. Computer Science Engineering
Chennai Institute of Technology
2024 — 2028 · 8.1 CGPA

Computer Science and Mathematics
Adarsh Vidya Kendra, Nagercoil
2022 — 2024 · 80%

ACHIEVEMENTS

Bitcoin Global Hackathon	Top 4 globally
Solana Colosseum	2nd Runner Up
Solana Solar Hackathon	2nd Runner Up
BNB Hackathon 2025	Greenfield Winner
BeachHack S7	Best Idea
Ideathon (Brikx)	2nd Runner Up
GDG Hackathon	Top 8
IIT Blockchain Hackathon	Top 10 finalist
IIT Smart Hostel	Top 20

SKILLS

BLOCKCHAIN
Solidity, Hardhat, Ethereum, Solana, Web3.js, Ethers.js, IPFS, ERC-1155

LANGUAGES
C, C++, Python, JavaScript, TypeScript, Java

WEB AND DATA
React, Node.js, Express, MongoDB, PostgreSQL / Supabase, REST APIs

AI AND TOOLS
LLM building, AI agents, market-analysis models, GitHub, Linux
